

SIDDHIVINAYAK RAGHAVRAJU

Email: vinayakraju01@gmail.com Mobile: +1 (940) 629-6186

Professional Summary

Full Stack Developer with 1.9 years of experience in designing and building scalable web applications, combined with a strong foundation in Artificial Intelligence and Machine Learning. Skilled in Python, Java, JavaScript, React, Node.js, TensorFlow, and AWS. Passionate about developing innovative solutions by blending software engineering and AI expertise. Seeking opportunities in AI/ML or software development to contribute to impactful projects.

Education

Master of Science in Artificial Intelligence
University Of North Texas, Denton TX USA
Expected Graduation: May 2026

Bachelor of Technology in Computer Science
SVPCET Puttur, Andhra Pradesh, India
Graduated: May 2021

Technical Skills

Programming Languages: Python, JavaScript, Java, SQL
Frameworks & Libraries: React.js, Node.js, Express.js, TensorFlow, PyTorch, Scikit-learn
Tools & Platforms: Git, Docker, AWS, REST APIs
Databases: MySQL, MongoDB, PostgreSQL

Professional Experience

Full Stack Software Developer

Infynect Labs PVT LTD

December 22- August 24

- Developed and maintained end-to-end web applications using React.js, Node.js, and MySQL, enhancing application performance and user experience.
- Implemented automation solutions and optimized workflows, increasing productivity by 15%.
- Worked on IPTV systems and integrated Digital Rights Management (DRM) solutions to ensure secure content delivery.
- Collaborated with cross-functional teams to deliver software aligned with business goals.
- Containerized applications with Docker and deployed on AWS, improving deployment efficiency.

Projects

Cryptocurrency Prediction

- Developed and fine-tuned a logistic regression-based machine learning model achieving an 87% accuracy rate in predicting credit card fraud.
- Minimized false positives by 16% through rigorous feature engineering and hyperparameter tuning processes.
- Implemented under-sampling and ensemble techniques to address class imbalance, leading to 15% improved performance.
- Successfully mitigated fraudulent transactions while optimizing model efficiency by 23% and accuracy by 6%.
- Integrated REST API endpoints for model predictions and created a simple dashboard using Flask for real-time insights.

Early Heart Disease Prediction

- Spearheaded the implementation of HIPAA-compliant data encryption protocols across all healthcare solutions, decreasing data breach incidents by 40% and ensuring patient privacy and security.
- Demonstrated commitment to ethical data practices while contributing to the development of data-driven healthcare solutions.
- Enhanced healthcare outcomes by 26% through accurate prediction of heart disease, positively impacting patient well-being.
- Designed data pipelines for preprocessing patient data and visualizing prediction results using Matplotlib and Tableau.

Leadership & Activities

- Coordinated and facilitated an Interstate Robotics Workshop, enhancing collaboration and technical skills among participants.
- Volunteered in planning and organizing FEASTA, a major cultural and technical fest, contributing to team management and event success.
- Completed a Personality Development Program by AP Skill Development, strengthening communication and professional skills.
- Participated in a Web Development Coding Competition, applying creative problem-solving to build innovative solutions.
- Recognized as one of five winning teams out of 26 in a University Hackathon for developing an innovative AI-powered web application.

Achievements

Recognized as one of five winning teams out of 26 in a University Hackathon for developing a machine learning-based solution that improved process automation and user engagement.
